Rate the group photos

Due Sunday, February 6, 2026, 11:59 pm.

You are asked to rate the group photos on a 1-to-10 scale on the following attributes. You are also encouraged to add comments. It will ask you to rate your own photo but I will discard those responses.

1. Faces are big enough and clear enough that everyone is easily recognizable. Everyone is identified and their names and the name of their team are easily readable.
2. It's original. It's clearly their own work. They haven't just pasted their faces onto someone else's artwork.
3. It's attractive and visually appealing. It's a nice piece of artwork. This could be a poster.
4. It's funny, clever, or creative. They've chosen a clever name and concept.
5. Excellent technical execution. Good composition, use of color, seamless photo editing. They put some effort into this and it shows.

Your score will be the percentage of all the groups x attributes you rated. Please try to give thoughtful ratings. In the workplace, you will need to be able to judge the quality of an idea and how well it's presented.

Each team will receive a report similar to the fictitious example on the next page. I will announce the ranking order but not the actual scores at lecture on Tuesday, Feb 10. To get the reports done on time, we need your votes by Friday 11:59 pm.

Hello, Aardvarks.

Here is how your classmates rated your team photo on a 1-to-10 scale. Ten is best.

Survey question	Team average	Class average
Faces are big enough and clear enough that everyone is easily recognizable. Everyone is identified and their names and the name of their team are easily readable.	9.85	9.24
It's original. It's clearly their own work. They haven't just pasted their faces onto someone else's artwork.	9.23	7.69

Overall average	9.44	7.84
Scaled and rounded to 100 points	94	78

Comments

1. Wow. Blew me away.
2. Great use of turtles on skateboards versus cats.
3. A little obvious AI.
4. You're mean to cats.
